

University of Pittsburgh – Swanson School of Engineering | David C. Frederick Honors College

Pittsburgh, PA

Bachelor of Science in Computer Engineering, Honors Degree

April 2027

Minor in Economics

GPA: 3.9/4.0

Relevant Coursework: Cyber-Physical Systems, Embedded Systems, ECE Project Systems Engineering

International Study: South Korea (2024), Czech Republic (2025), Brazil (2026)

EXPERIENCE

Aerotech, Inc.

Pittsburgh, PA

Software Engineering Intern - Application Development

May 2025 – August 2025

Developed C Transformations module for 2.11.0 release of Automation1 application in C#/.NET using MVVM.

Implemented a new operational mode for internal hardware tester to set flash parameters on-site after verification.

Verified and validated Automation1 features and resolved defects during release testing.

Engaged in cross-departmental collaboration using Jira and Epicor.

Own Company (acquired by Salesforce)

Englewood Cliffs, NJ

Software Engineering Intern - Platform

June 2024 – August 2024

Implemented a page object model and 30+ end-to-end tests for product platform using the Playwright framework for TypeScript.

Developed an experiment-procedure online that reduced bias by eliminating involvement of the experimenter and saved two hours and \$200 per experiment

Own Company (formerly OwnBackup)

Englewood Cliffs, NJ

Corporate Development Intern

September 2022 – May 2023

Analyzed data and generated reports to assist with strategic decisions.

Shadowed engineering teams during scrum meetings.

Fostered collaboration between product development and marketing teams.

Maintained professional relationships with prospective partners.

PROJECTS AND RESEARCH

HearSmart Hearing Aid

University of Pittsburgh

Assistant Researcher

September 2024 – April 2025

Architected Python-based real-time data acquisition pipeline for closed-loop, auto-focusing hearing aid system, coordinating data streams from multiple hardware inputs.

Interfaced patient-worn EEG hardware via the PYGDS library in Python, processing neural signal data to drive closed-loop audio-focus adjustment algorithms.

SaveIt!

University of Pittsburgh

Enclosure and Embedded Software Engineer

September 2024 – April 2025

Designed the AED-like enclosure and interfaced with the CPR manikin to connect to the ESP32s over Bluetooth.

Generated the bill of materials including sensors to interface with and wrote the GPIO code for each of the sensors.

Verified and assisted in the design process of the PCB using Altium.

LEADERSHIP AND ORGANIZATIONS

Institute of Electrical and Electronics Engineers – University of Pittsburgh Student Branch

University of Pittsburgh

Vice President (Former Activities Chair)

August 2023 – Present

Drove event programming strategy for University of Pittsburgh IEEE chapter, growing attendance 100%+; coordinated industry partnerships with companies including Hitachi and Aerotech, restructured chapter constitution, and launched official website.

Triangle Fraternity (STEM)

University of Pittsburgh

Vice President of Recruitment and Wellness Chair (Former Secretary)

March 2024 – Present

Organized and hosted recruitment events for an entire academic year welcoming new engineers, data scientists, computer scientists, and mathematicians into the fraternity.

Organized chapter proceedings and coordinated with executive board members to increase chapter participation in philanthropy, professional, and academic events.

SKILLS

Software: C, C#, XAML, Python, RISC-V, ARM-Assembly, VHDL

Platforms: Windows, Linux, Apple

Software: Jira, GitHub, GitLab, Prism, .NET, Fusion360, PlatformIO,
